EDUCATION

Savitribai Phule Pune University <i>B.E. in Artificial Intelligence and Data Science</i>	Pune, India 2020 – 2024
upGrad <i>UI/UX Design Bootcamp (Completed)</i>	Remote 2024
Microsoft <i>Professional UI/UX with AI Certification (In Progress)</i>	Remote 2025

EXPERIENCE

UI/UX and Product Designer <i>Reval Analytical Services Pvt Ltd</i>	Nov 2025 – Present Pune, India
- Owned end-to-end product design for enterprise web and mobile platforms in Figma, translating complex financial product requirements into visually consistent, user-centered interfaces aligned with platform design systems. - Improved user journey task completion rates by 22% by identifying and eliminating friction points within core workflows through heuristic evaluation and behavioral data analysis. - Built and maintained scalable design systems including reusable UI components, design tokens, and style guides, ensuring visual consistency across 40+ screens and accelerating interface design by 35%. - Created interactive prototypes with micro-interactions and behavioral states using Figma advanced prototyping, facilitating cross-functional alignment and reducing revision cycles by 40%. - Integrated AI-assisted design tools (Claude, v0, Cursor) to accelerate design exploration and iteration quality, reflecting proficiency with emerging technologies and AI-driven workflows. - Produced comprehensive design documentation and handoff annotations, ensuring smooth developer collaboration and achieving 95% first-pass development accuracy.	
UX Design Intern <i>iMocha</i>	Sept 2024 – Jun 2025 Pune, India
- Designed intuitive end-to-end user experiences for an enterprise SaaS recruitment platform, developing UX flows, wireframes, interactive prototypes, and high-fidelity mockups that improved recruiter task efficiency by 25%. - Translated product and business requirements into annotated interaction specifications and developer handoff documentation across 6 platform modules, achieving a 90%+ first-pass implementation rate. - Conducted user research through usability testing with 12 users, synthesizing findings into actionable design iterations that reduced workflow friction and improved user flow clarity by 33%. - Designed responsive interfaces aligned with Android Material Design and iOS Human Interface Guidelines, ensuring visual consistency and accessibility across mobile and web platforms. - Developed user journey maps and product flow diagrams to articulate design rationale, enabling cross-team alignment across Product, Engineering, and Marketing and reducing stakeholder misalignment by 45%. - Collaborated in an Agile environment, participating in design reviews and iterating across sprint cycles with cross-functional product and engineering teams.	

PROJECTS

Kitchen IQ Swiggy API-Integrated Restaurant Intelligence Web Platform	2026 – Present
- Owned end-to-end product design for a web-based restaurant intelligence platform, designing scalable information architecture and multi-filter UI patterns that reduced menu exploration time by 40%. - Designed high-fidelity prototypes in Figma communicating complex API-driven interaction states, loading behaviors, and empty states, achieving full engineering alignment in a single review cycle. - Built a comprehensive component library covering 30+ reusable UI components, ensuring visual consistency and maintainable aesthetics across all platform views. - Mapped critical user pain points in food discovery workflows, translating insights into a clean, action-oriented interface that improved feature discoverability by 35%.	
Aroma Labs Operations Workflow Platform	2025 – 2026

- Redesigned a complex multi-step operational workflow platform by applying design thinking to map user pain points, translating findings into guided interaction states that reduced manual operational effort by 35%.
- Designed role-based experiences with structured navigation and feedback mechanisms for 3 distinct user types, cutting onboarding time by 28% and making internal processes intuitive across diverse roles.
- Leveraged AI-assisted prototyping tools to accelerate design exploration, producing a higher volume of iteration variants and enhancing design quality across complex workflows.
- Built a modular design system enabling consistent UI delivery across 50+ screens and reducing component duplication by 60%.

Boult Audio | *Consumer Brand Mobile App Redesign*

2024 – 2025

- Led end-to-end UX and UI redesign of a consumer mobile product, producing wireframes, interaction patterns, and polished high-fidelity prototypes that improved feature discoverability by 28% and reduced user drop-off by 20%.
- Designed and documented a comprehensive design system with 25+ reusable components, interaction pattern specifications, and annotated handoff assets, ensuring consistent quality across all product touchpoints.
- Designed responsive, mobile-first interfaces adhering to iOS Human Interface Guidelines and Android Material Design principles, maintaining accessibility and visual consistency across device sizes.

Finance Z | *Personal Finance Web and Mobile App*

2024

- Executed full end-to-end product design in Figma from user research to high-fidelity prototyping, transforming complex financial data into a clean, action-oriented web and mobile experience.
- Conducted usability testing with 15 real users and applied iterative feedback to refine interaction flows and information hierarchy, improving task success rates from 58% to 82% across 3 test cycles.
- Built a modular component library aligned with the product design system, ensuring scalable, consistent UI delivery across 35+ screens and cutting design validation time by 50%.

TECHNICAL SKILLS

Design Tools: Figma (Advanced Prototyping), Adobe XD, Adobe Illustrator, FigJam, Miro, Webflow

Core Design Skills: End-to-End Product Design, UX Flows, Wireframing, High-Fidelity Prototyping, Interaction Design, Micro-interactions, Information Architecture, Mobile-First Design, Responsive Web Design, Visual Hierarchy, Typography, Color Systems, Grids

Design Systems: Component Libraries, Design Tokens, Style Guides, UI Patterns, Developer Handoff, Design Specifications

Research and Strategy: User Research, Usability Testing, User Journey Mapping, Behavioral Analytics, Data-Driven Decisioning, Feedback Synthesis, Human-Centered Design

Platform Standards: Android Material Design, iOS Human Interface Guidelines, Accessibility, Responsive Web Standards

AI and Emerging Tools: Claude, v0, Cursor, ChatGPT, Prompt Engineering, AI-Assisted Design, Conversational UX

Technical Awareness: HTML, CSS, Agile, Cross-Functional Collaboration, Dashboard Design, Data Visualization
