

KAUSHIK PATIL

Product Designer & UI/UX Designer | End-to-End Product Design | Design Systems | Interaction Design | AI-Powered Workflows
Pune, India | workkwithkaushik@gmail.com | +91 8080100711 | linkedin.com/in/kaushik-patil02 | workkwithkaushik.designfolio.me

PROFESSIONAL SUMMARY

Product Designer with 1+ year of experience owning design end-to-end, from user flows and wireframes to polished high-fidelity UI and interactive prototypes, across web platforms, SaaS products, and consumer applications. Thinks like a PM: advocates for users in every room, notices the extra click, and ships work that feels cohesive and intentional. Builds and maintains scalable design systems that bring structure to fast-moving product teams. AI-pilled and restlessly curious: actively uses Claude, v0, Rive, Spline, Cursor, and other emerging tools to accelerate exploration and push interaction quality. Shipped side projects and vibe-coded prototypes beyond the day job. Holds a B.E. in Artificial Intelligence and Data Science, combining technical grounding with strong visual taste and clear communication.

CORE SKILLS

Design Tools	Figma (Expert), FigJam, Miro, Adobe Illustrator, Adobe After Effects, Webflow
Product Design	End-to-End Product Design, UX Flows, Wireframing, High-Fidelity Prototyping, Interaction Design, Micro-interactions, Information Architecture
Design Systems	Component Libraries, Design Tokens, Style Guides, UI Patterns, Annotations, Developer Handoff
AI Design Tools	Claude, v0, Cursor, Rive, Spline, Lovable, Bolt, Stitch, Dreamflow, n8n
PM Thinking	User Advocacy, Feature Scoping, UX Writing, Usability Testing, Cross-functional Collaboration, Agile
Technical	HTML, CSS, Responsive Web Standards, Android Material Design, iOS Human Interface Guidelines

PROFESSIONAL EXPERIENCE

UI/UX and Product Designer

Reval Analytical Services Pvt Ltd | Pune, India | Nov 2025 - Present

- Owned product design end-to-end across web and mobile applications in Figma, translating product requirements into complete UX flows, wireframes, and polished high-fidelity UI, reducing design-to-handoff cycle time by 30%.
- Advocated for users in every product discussion, pushing back on features that added friction, eliminating 3 redundant interaction steps in core workflows and improving task completion rates by 22%.
- Built and maintained a scalable design system with reusable components, design tokens, and UI patterns, enabling consistent delivery across 40+ screens and cutting new screen design time by 35%.
- Created interactive prototypes communicating micro-interactions and behavioral states, enabling aligned execution with founders and engineers and reducing back-and-forth revision cycles by 40%.
- Integrated AI design tools including Claude, v0, and Cursor into the design workflow, accelerating design exploration speed by 3x and improving iteration quality across product features.
- Produced thorough design documentation and handoff annotations in Figma, achieving near-zero implementation ambiguity and a 95% first-pass development accuracy rate.
- Contributed social media and marketing design assets ensuring visual consistency across all brand touchpoints, supporting product storytelling for 2 platform launches.

UX Design Intern

iMocha | Pune, India | Sept 2024 - Jun 2025

- Designed intuitive end-to-end user experiences for an enterprise SaaS recruitment platform, creating UX flows, wireframes, interactive prototypes, and high-fidelity mockups that improved recruiter task efficiency by 25%.
- Translated product requirements into annotated interaction specs and design documentation, enabling accurate engineering handoff across 6 platform modules with a 90%+ first-pass implementation rate.
- Conducted usability testing with 12 users and synthesized findings into actionable design iterations, reducing friction in key platform workflows and improving user flow clarity by 33%.
- Collaborated cross-functionally with product, engineering, and marketing teams in an agile environment, participating in weekly design reviews and iterating across 4 sprint cycles.
- Designed responsive interfaces following Android Material Design and iOS Human Interface Guidelines, ensuring cross-platform consistency across 3 product surfaces.
- Developed user journey maps and product flow diagrams to articulate design rationale, enabling cross-team alignment and reducing stakeholder misalignment issues by 45%.

SELECTED PROJECTS

Kitchen IQ | Swiggy API-Integrated Restaurant Intelligence Web Platform | 2026 - Present

- Owned end-to-end product design of a web-based restaurant intelligence platform integrating the Swiggy API, designing complex data flows, search experiences, and multi-filter UI patterns that reduced menu exploration time by 40%.
- Designed a scalable information architecture to surface real-time restaurant data, ratings, and category insights from the Swiggy API, enabling users to make decisions 2x faster compared to native app browsing.
- Built interactive high-fidelity prototypes in Figma communicating complex API-driven interaction states, loading behaviors, and empty states, achieving full alignment with engineering in a single review cycle.
- Developed a comprehensive component library and design system for the platform, covering 30+ reusable UI components and ensuring visual consistency across all data-dense views.
- Advocated for user needs by mapping critical pain points in food discovery workflows, translating insights into a clean, action-oriented interface that improved feature discoverability by 35%.

Aroma Labs | Operations Workflow Platform | 2025 - 2026

- Redesigned a complex multi-step operational workflow platform end-to-end, applying design thinking to map user pain points and translating findings into guided interaction states that reduced manual operational effort by 35%.
- Designed role-based experiences with structured navigation and feedback mechanisms for 3 distinct user roles, making internal processes intuitive for diverse user types and cutting onboarding time by 28%.
- Used AI-assisted prototyping tools to accelerate design exploration, producing 4x more iteration variants per sprint and improving design quality across 8 workflow scenarios.
- Built a modular design system aligned with the platform's design language, enabling consistent UI delivery across 50+ screens and reducing component duplication by 60%.

Finance Z | Personal Finance Web and Mobile App | 2024 - 2024

- Executed full end-to-end product design in Figma from user research and persona creation through information architecture, wireframing, and high-fidelity prototyping, transforming complex financial data into a clean, action-oriented experience.
- Conducted usability testing with 15 real users and applied iterative feedback to refine interaction flows and interface hierarchy, improving task success rates from 58% to 82% across 3 test cycles.
- Built a modular component library aligned with the product's design system, ensuring scalable, consistent UI delivery across 35+ screens on web and mobile.
- Created interactive prototypes communicating multi-step financial flows, enabling structured stakeholder feedback loops and cutting design validation time by 50%.

Boult Audio | Consumer Brand Mobile App Redesign | 2024 - 2025

- Led end-to-end UX and UI redesign of a consumer mobile product, producing wireframes, interaction patterns, and polished high-fidelity prototypes that improved feature discoverability by 28% and reduced user drop-off by 20%.
- Designed and documented a comprehensive design system with 25+ reusable components, interaction pattern specifications, and annotated handoff assets, ensuring consistent quality across all product touchpoints.
- Contributed social media and marketing design assets aligned with the brand's visual identity, maintaining cohesive brand presence across 5 digital channels.

EDUCATION

B.E. in Artificial Intelligence and Data Science

Savitribai Phule Pune University, Pune, India | 2020 - 2024

CERTIFICATIONS

Microsoft Professional UI/UX with AI Certification (In Progress)

upGrad UI/UX Design Bootcamp (Completed)
